orders, and custom keying please call (833) 3HD-LOCK / (833) 343-5625

About us

Universal Hardware delivers dependable mechanical door hardware designed for commercial jobs where durability, code compliance, and value matter most. As a trusted partner with The Home Depot for more than 15 years, we offer a broad assortment of locks, closers, and accessories suited for virtually any commercial environment.

Every product is constructed from high-strength materials and tested to meet or exceed industry standards—so you can specify and install with confidence. Our products are ideal for high-traffic applications including schools, churches, hotels, hospitals, office buildings, and multi-family housing.

Performance You Can Count On

All Universal Hardware locks and closers undergo extensive performance testing, including:

- Cycle testing
- Door impact testing
- Latchbolt strength testing
- Torque testing

Many models also meet ADA requirements and carry UL 10C fire ratings up to 3 hours, helping ensure compliance nationwide.

Whether you're upgrading security or outfitting new construction, Universal Hardware offers reliable, job-ready solutions that work as hard as you do.

To find the right hardware for your next project, visit the Pro Desk at The Home Depot.

PROGRAM OVERVIEW

Keying Services & Bulk Ordering

Comprehensive Commercial Hardware Program

Dedicated Service Reps

Custom Keying Services

We can work with your existing keyed system or develop a new one to meet your needs. Keying options range from:

- Keyed Alike
- Keyed Different
- Master Keyed
- Construction Keyed
- Master Construction Keyed
- Maison Keyed
- Grand Master Keyed
- Great Grand Master Keyed

Lever/Knob Functions

| Outside/Inside | Function | ANSI No | Function Description |
|---|-----------------------|--|--|
|  | Passage | F75 | <p>The Passage lever has a latchbolt that is operated by the lever from either side at all times. It does not have a lock function.</p> |
|  | Privacy | <p>F76</p> <p>F76A (Panic release)</p> <p>F76B (Non-Panic release)</p> | <p>The Privacy lever has a latchbolt that is operated by the lever from either side, except when the outside lever is locked by the turn button inside. An emergency release on the outside unlocks the locking device. The turn button must be in the unlocked position for the outside or inside lever to operate.</p> <p>ANSI F76A (Panic release): The privacy lever has a latch bolt that's operated by the lever from either side, except when the outside lever is locked by the push button inside. An emergency release on the outside unlocks the locking device. Inside lever is always free for immediate egress.</p> <p>ANSI F76B: Privacy Lock (non-panic release): Latchbolt operated by lever from either side except when outside lever is locked by turn button inside. Emergency release on outside unlocks locking device. Turn button shall be in unlocked position for outside or inside lever to operate latch bolt.</p> |
|  | Keyed Entry | <p>F81</p> <p>F82B</p> <p>F109</p> | <p>F81: Entry Lock Deadlocking latchbolt operated by lever from either side except when outside lever is locked by turn button inside. Operating key in outside lever locks or unlocks locking device. Turn button shall be in unlocked position for outside or inside lever to operate latch bolt.</p> <p>F82B: Entry Lock Deadlocking latchbolt operated by knob or lever from either side except when outside knob/lever is locked by turn button or push button inside. Operating key in outside knob/lever unlocks locking device. Operating inside knob/lever unlocks locking mechanism and operates latch bolt.</p> <p>F109: Entry Lock (dual locking functionality) Deadlocking latchbolt operated by lever from either side except when outside lever is locked by turn button or push button inside. Operating key in outside lever or operating inside lever releases the push or turn button unlocking outside lever except when push or turn button has been both pushed and rotated to keep outside lever locked. When pushed and rotated, inside push or turn button must be manually operated to unlock outside lever. Inside lever is always free.</p> |
|  | Keyed Entry-Storeroom | F86 | <p>The Keyed Entry – Storeroom lever has a deadlocking latchbolt operated by a key in the outside lever or by rotating the inside lever. The outside lever is always locked. The Keyed Entry – Storeroom lever has a deadlocking latchbolt operated by a key in the outside lever or by rotating the inside lever. The outside lever is always locked.</p> |
